

Neutral Condition

Unblinded First-Pass Scoring Packet

30 targets • original Neutral-condition trial order

Purpose

Use this packet for your own forgiving, unblinded review. Each page pairs the actual physical target with the exact Neutral-condition AI description that was generated for that identifier.

Suggested scoring

- Hit — enough correspondence that you would reasonably call the session successful under a forgiving remote-viewing interpretation.
- Partial — some meaningful correspondence, but not enough to confidently call it a hit.
- Miss — mostly incompatible, or only generic overlap.

Important: This is intentionally not blinded. Do not compare your ratings to prior statistics while scoring if you want your first-pass judgment to stay as independent as possible.

Neutral Session 1 • Trial 1

Masking tape roll | Identifier: CE9E-ZRN2

AI description

1. GESTALT

Artificial/structural mixed with open space. Dry impression. Static overall, with a localized sense of movement or flow. Possibly elevated or exposed.

2. SENSORY QUALITIES

Muted gray, pale tan, off-white, with a darker linear area. Bright ambient light. Cool-to-neutral temperature. Hard, smooth-to-rough material contrast. Faint metallic or mineral quality. Little smell impression. Possible low continuous rushing/humming sound.

3. GEOMETRY

Strong horizontal line or edge. One prominent vertical or angled element. Repetition of narrow linear forms. Rectangular geometry with an opening, gap, or drop-off. Some curvature appears secondary.

4. SPATIAL RELATIONSHIPS

Large feature extending across space. Open area around or below it. Smaller clustered details attached to or near the main form. Sense of height or separation between upper and lower regions.

5. DISTINCTIVE FEATURES

Most salient impression: a long hard-edged form spanning or bordering a relatively empty space, with a pronounced change in level. A darker band or recessed area stands out.

6. ANALYTICAL OVERLAY — guesses only

- Bridge or elevated walkway
- Dam/spillway-like structure
- Industrial or civic structure beside open terrain

7. CONFIDENCE

24/100

YOUR UNBLINDED RATING: ☐ **Hit** ☐ **Partial** ☐ **Miss**

Neutral Session 1 • Trial 2

Rifle scope | Identifier: RLA2-6WFM

AI description

1. GESTALT

Natural dominant impression. Open, somewhat expansive. Possible living/vegetative component. Dry-to-neutral overall, with a softer localized sense of moisture.

2. SENSORY QUALITIES

Green, brown, pale blue, and patches of bright white. Moderate brightness. Mild-to-warm temperature. Mixed textures: soft, fibrous, uneven, with harder rough surfaces beneath or nearby. Possible wind movement. Faint rustling or intermittent natural sound.

3. GEOMETRY

Irregular contours. Several vertical forms rising from a broader horizontal base. Branching or radiating patterns. Uneven spacing rather than strict symmetry.

4. SPATIAL RELATIONSHIPS

Open area with clustered elements. Taller narrow features above lower spreading forms. Sense of depth extending into the distance. Foreground feels more textured and dense than background.

5. DISTINCTIVE FEATURES

A salient contrast between upright narrow forms and a broad open surrounding area. One portion feels denser or darker, while another feels exposed and brightly lit.

6. ANALYTICAL OVERLAY — guesses only

- Sparse woodland or grove
- Parkland or meadow with trees
- Rural landscape near low vegetation

7. CONFIDENCE

21/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 3

Hard drive | Identifier: R6XA-BAZH

AI description

1. GESTALT

Artificial and enclosed impression. Object/structure dominant. Dense, static, with a smaller sense of contained activity.

2. SENSORY QUALITIES

Dark gray, black, muted silver, and a small bright area. Cool temperature. Hard, smooth surfaces mixed with ridged or textured sections. Metallic quality. Possible faint mechanical hum or clicking. Air feels dry.

3. GEOMETRY

Strong rectangular forms. Parallel lines, repeated slots or narrow divisions. One circular or rounded feature contrasts with the angular geometry. Clear edges and layered surfaces.

4. SPATIAL RELATIONSHIPS

Compact central feature within a larger enclosing space. Several smaller components arranged close together. Sense of front/back layering and partial concealment. Little open distance.

5. DISTINCTIVE FEATURES

Most salient is a dark, compact assembly with repeated linear details and one noticeably brighter or smoother element. Impression of parts fitted tightly together.

6. ANALYTICAL OVERLAY — guesses only

- Machine or mechanical equipment
- Control panel / technical device
- Interior industrial installation

7. CONFIDENCE

27/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 4

Paintbrush package | Identifier: WHCS-R6CC

AI description

1. GESTALT

Natural and open impression. Strong landscape quality. Possible water present. Broad, exposed, with one dominant large feature.

2. SENSORY QUALITIES

Blue-gray, white, dark green, and brown. Bright light with some glare. Cool-to-cold temperature. Hard, rough surfaces contrasted with smooth reflective areas. Possible wind and distant rushing or crashing sound. Moist air impression.

3. GEOMETRY

Large irregular mass with sloping or steep edges. Curved boundary below or beside it. Horizontal layering. Some jagged contours and broken linear features.

4. SPATIAL RELATIONSHIPS

Large feature rising above a lower open region. Strong above/below relationship. Wide distance, little enclosure. One side feels dense and solid; the other more empty or fluid.

5. DISTINCTIVE FEATURES

Most salient is a high, uneven edge or face adjacent to a smoother, lower expanse. Brightness seems concentrated along an upper or exposed surface.

6. ANALYTICAL OVERLAY — guesses only

- Coastal cliff or rocky shoreline
- Mountain beside a lake or sea
- Glacier or snow-covered rock formation

7. CONFIDENCE

23/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 5

Ceramic jack-o'-lantern / pumpkin | Identifier: Q7MA-MHXY

AI description

1. GESTALT

Mixed artificial/natural impression. Open rather than enclosed. Large-scale setting with one distinct central or elevated feature. Mostly static.

2. SENSORY QUALITIES

Pale tan, gray, white, and muted blue. Bright, dry atmosphere. Warm-to-neutral temperature. Hard, coarse, weathered textures. Possible stone, concrete, or mineral-like surface. Little sound; faint wind impression.

3. GEOMETRY

Broad horizontal base with a taller vertical or tapering form. Angular edges mixed with irregular contours. Some stepped or layered geometry. Possible opening or recessed dark area.

4. SPATIAL RELATIONSHIPS

One prominent feature standing apart from lower surrounding elements. Open space around it. Strong foreground/background separation. Sense of looking slightly upward or across a broad exposed area.

5. DISTINCTIVE FEATURES

A light-colored elevated mass with a sharper top or edge seems especially salient. Darker recesses or shadowed breaks interrupt the otherwise bright surface.

6. ANALYTICAL OVERLAY — guesses only

- Monument or large stone structure
- Ruin or fortified site
- Rocky formation with architectural features

7. CONFIDENCE

22/100

YOUR UNBLINDED RATING: ☒ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 6

Green Nintendo 64 game case / cartridge | Identifier: 5HPZ-G2ZS

AI description

1. GESTALT

Artificial dominant impression. Enclosed or semi-enclosed. Object/structure quality. Dense, orderly, mostly static.

2. SENSORY QUALITIES

Dark blue-gray, black, silver, and small bright highlights. Cool-neutral temperature. Smooth, hard surfaces with some glossy or reflective areas. Metallic/plastic material impression. Possible low hum and occasional sharper mechanical sound.

3. GEOMETRY

Rectangular framework with repeated parallel lines. Circular or cylindrical element present. Strong symmetry or regular spacing. Several small openings, slots, or segmented sections.

4. SPATIAL RELATIONSHIPS

Compact components grouped tightly inside a larger boundary. Central feature with smaller elements around it. Clear front/back layering. Limited open space.

5. DISTINCTIVE FEATURES

A repeated pattern of narrow dark-and-light sections feels salient, along with one rounded or rotating-looking component. Overall impression is engineered and tightly assembled.

6. ANALYTICAL OVERLAY — guesses only

- Mechanical apparatus
- Electronic/technical equipment
- Interior of a vehicle or machine

7. CONFIDENCE

26/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 7

Coin / medallion in display case | Identifier: P7WX-4BZH

AI description

1. GESTALT

Natural dominant impression. Open, spacious, somewhat elevated. Dry-to-neutral. Strong landscape quality with one prominent irregular feature.

2. SENSORY QUALITIES

Brown, ochre, gray, muted green, pale blue. Bright light. Warm surface temperature with cooler air. Rough, granular, weathered textures. Stone or earth-like material. Possible wind; otherwise quiet.

3. GEOMETRY

Irregular vertical faces, sloping planes, broken edges, layered horizontal bands. Some narrow gaps or recesses. Little symmetry.

4. SPATIAL RELATIONSHIPS

Large solid mass beside or above a more open lower area. Strong near/far depth. Smaller features clustered near the base. Sense of height and exposed space.

5. DISTINCTIVE FEATURES

A steep, rough-edged formation with visible layering or striation feels most salient. One darker recessed region contrasts with brighter exposed surfaces.

6. ANALYTICAL OVERLAY — guesses only

- Canyon or cliff formation
- Desert rock outcrop
- Mountain escarpment

7. CONFIDENCE

25/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 8

Clear ridged drinking glass | Identifier: W4WC-SV3T

AI description

1. GESTALT

Mixed artificial and open-space impression. Structure/object dominant. Mostly dry. Moderate sense of activity or movement nearby.

2. SENSORY QUALITIES

White, gray, muted red or orange, darker shadowed areas. Bright illumination. Neutral-to-warm temperature. Hard smooth surfaces mixed with rougher ground texture. Possible metallic quality. Intermittent sharp or rhythmic sound impression.

3. GEOMETRY

Strong vertical and horizontal lines. Rectangular masses, repeated segments, and one curved or rounded element. Clear edges. Possible long narrow extension.

4. SPATIAL RELATIONSHIPS

One larger central feature with smaller adjacent elements. Open space around it. Some sense of elevation or raised components. Foreground feels more structured than the distant background.

5. DISTINCTIVE FEATURES

A bright, hard-edged form with a contrasting darker section stands out. One elongated component seems to project outward or upward.

6. ANALYTICAL OVERLAY — guesses only

- Vehicle or transportation-related structure
- Industrial equipment in an open area
- Facility with a crane, arm, or projecting mechanism

7. CONFIDENCE

23/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 9

Computer cooling fan | Identifier: 9PA6-TYLT

AI description

1. GESTALT

Natural dominant impression. Open, broad, somewhat exposed. Possible water or moist element. Mostly static with gentle movement.

2. SENSORY QUALITIES

Blue, gray, muted green, white. Cool temperature. Smooth reflective texture contrasted with rougher irregular surfaces. Damp or fresh-air quality. Possible soft rushing, lapping, or wind sound.

3. GEOMETRY

Broad horizontal expanse. Curved or irregular boundary. One taller vertical or sloping feature. Scattered smaller shapes rather than strict repetition.

4. SPATIAL RELATIONSHIPS

Large open area in front or below, with denser material along one edge. Strong near/far depth. One side feels open and unobstructed; the other more solid and textured.

5. DISTINCTIVE FEATURES

A bright or reflective surface bordered by a darker uneven edge feels most salient. There may be a narrow transition zone between smooth and rough areas.

6. ANALYTICAL OVERLAY — guesses only

- Lake or coastal shoreline
- River beside rocky terrain
- Open water near a sloping landscape

7. CONFIDENCE

20/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 1 • Trial 10

DeWalt folding utility knife | Identifier: SJCJ-RD7E

AI description

1. GESTALT

Artificial dominant impression. Structured, partly enclosed, medium-to-large scale. Static overall with localized activity.

2. SENSORY QUALITIES

Gray, off-white, dark blue, small yellowish highlights. Neutral-to-cool temperature. Hard smooth surfaces with some matte, rougher sections. Metallic or concrete-like material quality. Possible echo, hum, or intermittent clatter.

3. GEOMETRY

Strong verticals and horizontals. Repeating rectangular sections. One broader curved or arched feature may be present. Layered planes and clear boundaries.

4. SPATIAL RELATIONSHIPS

Large enclosing framework with smaller elements inside or alongside it. Sense of depth through an opening or corridor-like space. Some features appear elevated above a lower level.

5. DISTINCTIVE FEATURES

A repeated structural pattern interrupted by one larger opening or curved form feels most salient. Contrast between bright exposed surfaces and a darker interior/recess.

6. ANALYTICAL OVERLAY — guesses only

- Transit station or terminal
- Industrial building interior
- Large public structure with bays or platforms

7. CONFIDENCE

24/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 1

LED light bulb | Identifier: P5NN-D5ET

AI description

1. GESTALT

Artificial/structural. Open rather than enclosed. Dry. Strong vertical component with surrounding space. Possible energetic or moving element nearby.

2. SENSORY QUALITIES

Bright to moderately bright. Colors: pale gray, white, muted blue, small darker areas. Cool temperature impression. Hard, smooth material with some roughness at edges. Faint rushing or humming quality. Little sense of smell. Movement feels intermittent rather than constant.

3. GEOMETRY

Vertical lines, one dominant narrow/tall form. Angled or tapering edges. Repetition of smaller linear elements. Some circular or curved feature near a junction. Strong contrast between a solid feature and open background.

4. SPATIAL RELATIONSHIPS

One larger feature appears isolated or prominent, with smaller elements around or below it. Considerable open space above and to the sides. Possible elevated viewpoint or feature extending upward. Near/far depth is noticeable.

5. DISTINCTIVE FEATURES

A salient impression of something elongated rising from a broader base or surrounding area. A contrasting moving, flowing, or vibrating component seems associated with it, though this is weak.

6. ANALYTICAL OVERLAY — guesses only

- Tower or mast
- Bridge-related structure
- Industrial or engineered outdoor installation

7. CONFIDENCE

27/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 2

Fresh Kitty litter package | Identifier: 22MX-UQCV

AI description

1. GESTALT

Natural mixed with possible artificial elements. Open. Moderately wet or humid impression. Broad landscape feel rather than a single isolated object.

2. SENSORY QUALITIES

Muted green, dark gray, brown, and some lighter reflective areas. Cool to neutral temperature. Uneven, coarse textures with smoother patches. Possible water or wind sound. Movement feels slow and lateral.

3. GEOMETRY

Irregular contours. Low horizontal spread. Some vertical protrusions or clustered upright forms. Curving boundary or edge. Little symmetry.

4. SPATIAL RELATIONSHIPS

Wide area with foreground/background separation. Something lower lies beside or below a denser raised region. Clustered features toward one side, more open space toward another.

5. DISTINCTIVE FEATURES

A strong boundary impression: two different textures or surfaces meeting along an irregular line. One side seems denser and rougher; the other smoother and more open.

6. ANALYTICAL OVERLAY — guesses only

- Shoreline or riverbank
- Vegetated hillside beside water
- Park or natural area with a built feature nearby

7. CONFIDENCE

24/100

YOUR UNBLINDED RATING: ☐ Hit ☒ Partial ☐ Miss

Neutral Session 2 • Trial 3

Crocheted duck plush | Identifier: K39X-PE6Y

AI description

1. GESTALT

Artificial. Enclosed or partly enclosed. Dense, solid, stationary. Possible structure or large object.

2. SENSORY QUALITIES

Dark gray, black, dull metallic tones, with a small brighter area. Cool. Hard, smooth-to-matte surfaces. Slight echoing or mechanical sound impression. Dry. Little movement.

3. GEOMETRY

Strong rectangular forms. Parallel horizontal and vertical lines. Repeating panels or segments. One prominent opening, recess, or framed area. Mostly angular.

4. SPATIAL RELATIONSHIPS

Large central mass with smaller features attached or adjacent. Sense of interior depth behind an outer surface. Features appear close together rather than widely dispersed.

5. DISTINCTIVE FEATURES

A dark, broad surface interrupted by a lighter rectangular or recessed section. Repetition along one axis feels salient.

6. ANALYTICAL OVERLAY — guesses only

- Industrial interior
- Large vehicle or machinery
- Building facade or entrance

7. CONFIDENCE

22/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☒ Miss

Neutral Session 2 • Trial 4

Ryobi electric screwdriver | Identifier: D2T2-HUYC

AI description

1. GESTALT

Natural. Open. Bright. Dry-to-neutral. Strong landscape impression with one dominant elevated feature.

2. SENSORY QUALITIES

Tan, pale brown, off-white, muted blue. Warm temperature. Rough, granular, weathered texture. Hard material. Quiet overall, with possible wind. Little obvious movement.

3. GEOMETRY

Angular slopes, irregular edges, broad horizontal base. One rising mass with broken or jagged contours. Some layered or banded patterning.

4. SPATIAL RELATIONSHIPS

Large feature occupying much of the view. Open space above and around it. Smaller forms near the base. Strong near/far depth, with distant background possibly visible.

5. DISTINCTIVE FEATURES

A prominent elevated surface or formation with uneven, stepped, or eroded-looking edges. Contrast between a textured solid mass and clear open space.

6. ANALYTICAL OVERLAY — guesses only

- Rocky cliff or mesa
- Desert landscape
- Large weathered stone structure

7. CONFIDENCE

29/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☒ Miss

Neutral Session 2 • Trial 5

Small cardboard box | Identifier: S7ZX-RAK2

AI description

1. GESTALT

Artificial mixed with natural. Open or semi-open. Bright. Possible water nearby. Moderate sense of activity or motion.

2. SENSORY QUALITIES

Blue, white, gray, with small vivid accents. Cool-to-neutral temperature. Smooth hard surfaces mixed with reflective or wet qualities. Possible splashing, rushing, or crowd-like background sound. Movement is more noticeable here than in prior trials.

3. GEOMETRY

Curves combined with straight structural lines. Repeating vertical or radial elements. One broad open area bordered by denser features. Some circular or arcing geometry.

4. SPATIAL RELATIONSHIPS

A central or foreground feature with surrounding open space. Multiple smaller elements grouped around it. Possible height difference between one elevated feature and a lower flat area.

5. DISTINCTIVE FEATURES

A bright reflective surface or moving element stands out against more rigid structural forms. There may be repeated upright elements bordering or framing part of the scene.

6. ANALYTICAL OVERLAY — guesses only

- Fountain or water feature
- Amusement or recreational setting
- Plaza with a large engineered feature

7. CONFIDENCE

26/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 6

Black cylindrical tube | Identifier: ZNMH-4DZW

AI description

1. GESTALT

Natural. Open. Cool. Wet or damp impression. Broad, quiet environment with one denser area.

2. SENSORY QUALITIES

Dark green, gray, muted blue, brown. Cool temperature. Soft, uneven, possibly mossy or vegetated textures mixed with smoother wet surfaces. Faint water or wind sound. Slow movement.

3. GEOMETRY

Irregular vertical forms, curved boundaries, layered horizontal zones. Few sharp angles. Repeating thin upright elements.

4. SPATIAL RELATIONSHIPS

Dense region to one side or in the background, more open area in front. Strong depth. Lower smooth area beside or beneath taller clustered forms.

5. DISTINCTIVE FEATURES

A transition between closely packed upright textures and a flatter, more reflective or open surface feels especially salient.

6. ANALYTICAL OVERLAY — guesses only

- Forest beside water
- Wetland or lakeshore
- Wooded valley

7. CONFIDENCE

25/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 7

Black slide sandal | Identifier: 9EXL-JPCW

AI description

1. GESTALT

Artificial. Open or partly open. Large-scale structure or engineered object. Dry. Strong sense of height and rigid mass.

2. SENSORY QUALITIES

Light gray, white, darker shadowed areas, possible metallic sheen. Neutral-to-cool temperature. Hard, smooth surfaces with some rough or ribbed sections. Low mechanical hum or distant resonant sound impression. Minimal movement.

3. GEOMETRY

Tall verticals, strong diagonals, repeated linear supports. Rectangular and triangular relationships. Possible grid, frame, or lattice pattern. Clear structural symmetry or near-symmetry.

4. SPATIAL RELATIONSHIPS

One dominant large feature with open space around or beneath parts of it. Smaller repeated elements appear attached to or supporting the main form. Sense of looking upward or across a considerable span.

5. DISTINCTIVE FEATURES

A large rigid form seems supported by multiple narrower elements, creating open gaps between solid sections. Height or span feels more salient than surface detail.

6. ANALYTICAL OVERLAY — guesses only

- Bridge or elevated framework
- Large industrial structure
- Monumental architectural feature

7. CONFIDENCE

28/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 8

Brown leather-and-cord laced object | Identifier: AF4D-NG43

AI description

1. GESTALT

Artificial, structure-like, open rather than enclosed. Dry. Strong vertical element with surrounding horizontal space. Possible energetic or moving component.

2. SENSORY QUALITIES

Muted gray, off-white, darker blue or black accents. Bright natural light. Cool-to-neutral temperature. Hard, smooth surfaces mixed with something rougher or granular. Faint metallic quality. Possible low continuous sound, with intermittent sharper noise. Movement feels directional rather than chaotic.

3. GEOMETRY

Prominent straight lines and hard angles. One tall or elongated form. Repeating narrow elements or segments. Rectangular openings or gaps. Some symmetry, but not exact. Horizontal base or platform beneath a more vertical feature.

4. SPATIAL RELATIONSHIPS

A large central feature with considerable open space around it. Smaller elements clustered near its base or along one side. Impression of looking upward or from below. Possible separation between foreground structure and distant background.

5. DISTINCTIVE FEATURES

A narrow elevated section, edge, or projection stands out. Contrast between a solid main mass and thinner repeated components. Possible exposed framework or support-like elements.

6. ANALYTICAL OVERLAY — guesses

- Bridge or elevated structural framework
- Tower, mast, or industrial structure
- Large transportation-related site

7. CONFIDENCE

24/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 9

Tan 5.11 baseball cap | Identifier: 3M4D-D6QK

AI description

1. GESTALT

Mixed natural/artificial. Open. Bright-to-moderate. Dry or only slightly damp. Moderate scale. More horizontal than vertical.

2. SENSORY QUALITIES

Tan, gray, muted green, some pale blue or white. Neutral temperature. Hard, rough surfaces mixed with smoother areas. Faint wind or distant ambient noise. Little strong motion.

3. GEOMETRY

Broad horizontal planes, low angular forms, a few repeated rectangular elements. One curved or irregular boundary. Mostly simple geometry rather than intricate patterning.

4. SPATIAL RELATIONSHIPS

Open foreground with denser features farther back. Several smaller elements grouped rather than one dominant central mass. Possible raised section behind a flatter area.

5. DISTINCTIVE FEATURES

A contrast between a flat, open surface and a cluster of harder, more structured forms. One edge or boundary seems visually pronounced.

6. ANALYTICAL OVERLAY — guesses only

- Outdoor built site beside natural terrain
- Ruins or low stone structures
- Open plaza or terrace

7. CONFIDENCE

23/100

YOUR UNBLINDED RATING: ☒ Hit ☐ Partial ☐ Miss

Neutral Session 2 • Trial 10

Clear zip bag of sand / gravel | Identifier: SPY2-GRWE

AI description

1. GESTALT

Natural dominant. Open. Cool-to-neutral. Possibly wet. Broad scene with one strong central feature.

2. SENSORY QUALITIES

Blue-gray, green, white, dark brown. Cool air. Rough and uneven textures mixed with smoother reflective areas. Possible rushing or splashing sound. Noticeable movement associated with one area.

3. GEOMETRY

Irregular vertical drop or steep boundary. Curving edges. Layered horizontal bands. Scattered angular forms below or around the main feature.

4. SPATIAL RELATIONSHIPS

Higher region feeding or connecting to a lower region. Strong above/below relationship. Open space in front, denser material at the sides. Moderate-to-large scale.

5. DISTINCTIVE FEATURES

A bright or pale moving feature descending across a darker, rougher background feels most salient. Spray, mist, or fragmentation is a weak secondary impression.

6. ANALYTICAL OVERLAY — guesses only

- Waterfall
- Steep rocky stream or cascade
- Cliffside with moving water

7. CONFIDENCE

31/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 3 • Trial 1

Red rectangular device / case | Identifier: 77RZ-55NU

AI description

1. GESTALT

Artificial/structural; open rather than enclosed. Possible natural elements nearby. Dry impression. Static overall, with some localized movement.

2. SENSORY QUALITIES

Muted gray, off-white, dark blue, and a small impression of green. Moderate-to-bright light. Cool or neutral temperature. Hard, smooth material mixed with rougher surfaces. Slight metallic quality. Faint repetitive or rushing sound impression; uncertain.

3. GEOMETRY

Strong horizontal line with one or more vertical elements intersecting it. Angular forms. Repetition at intervals. A broad flat or elongated feature. Possible opening, gap, or drop beneath part of the structure.

4. SPATIAL RELATIONSHIPS

Something long or wide extending across space. Elevated relative to a lower area. Open surroundings. Main feature feels large compared with nearby smaller elements. Possible distant background mass or terrain.

5. DISTINCTIVE FEATURES

Most salient impression: an elongated rigid feature spanning or crossing an apparent separation, with repeated vertical or linear components. Secondary impression of movement underneath or alongside it, but this is weak.

6. ANALYTICAL OVERLAY — guesses

- Bridge or elevated walkway
- Dam or engineered water-control structure
- Large industrial/platform-like structure

7. CONFIDENCE

24/100

YOUR UNBLINDED RATING: ☐ Hit ☒ Partial ☐ Miss

Neutral Session 3 • Trial 2

Lotion pump bottle | Identifier: G5MQ-43Y7

AI description

1. GESTALT

Natural-dominant; landscape/open setting. Possible living elements. Dry to mixed moisture impression. Broad, quiet, relatively static.

2. SENSORY QUALITIES

Tan, pale brown, muted green, and bright white highlights. Warm light. Dry, coarse, granular texture with some smoother patches. Faint wind-like sound impression. Low density overall with denser localized forms.

3. GEOMETRY

Irregular rounded masses. Sloping lines. One stronger vertical or upright feature. Broken, non-repeating contours. Possible layered or terraced appearance.

4. SPATIAL RELATIONSHIPS

Large open area with one dominant feature rising above lower surroundings. Smaller elements scattered nearby. Strong near/far depth impression. Exposed rather than enclosed.

5. DISTINCTIVE FEATURES

A prominent pale or light-toned mass with an uneven surface stands out against broader flatter surroundings. There may be a sharp transition between elevated and lower ground.

6. ANALYTICAL OVERLAY — guesses

- Rocky outcrop or cliff formation
- Arid hillside or canyon edge
- Large pale stone structure in a sparse landscape

7. CONFIDENCE

21/100

YOUR UNBLINDED RATING: ☒ Hit ☐ Partial ☐ Miss

Neutral Session 3 • Trial 3

Yu-Gi-Oh card in clear case | Identifier: MPEN-XAFC

AI description

1. GESTALT

Mixed artificial/natural impression. Enclosed or partially enclosed setting. Object or structure dominant. Cool, still, somewhat dense.

2. SENSORY QUALITIES

Dark gray, black, dull silver, and a small red or orange accent. Cool temperature. Smooth hard surfaces with some matte texture. Metallic or stone-like material quality. Very little sound; possibly a faint hum or echo.

3. GEOMETRY

Rectangular planes, straight edges, a curved or circular element, and repeated narrow vertical lines. Strong contrast between a solid mass and one recessed or open area.

4. SPATIAL RELATIONSHIPS

A medium-to-large central feature with smaller components attached or adjacent. Something appears set within, behind, or beneath a larger frame. Close spatial arrangement rather than expansive distance.

5. DISTINCTIVE FEATURES

A dark, rigid form with one contrasting rounded or recessed feature feels most salient. There is also a possible bright accent localized to one small area.

6. ANALYTICAL OVERLAY — guesses

- Industrial machinery
- Interior architectural feature
- Vehicle or mechanical assembly

7. CONFIDENCE

19/100

YOUR UNBLINDED RATING: ☐ **Hit** ☐ **Partial** ☐ **Miss**

Neutral Session 3 • Trial 4

Black stapler | Identifier: MG87-TP8T

AI description

1. GESTALT

Natural-dominant; open landscape. Possible water presence. Broad, exposed, calm with one stronger vertical feature.

2. SENSORY QUALITIES

Blue-gray, pale tan, white, and muted green. Bright diffuse light. Cool to mild temperature. Smooth/wet quality contrasted with rough, hard surfaces. Faint wind and low continuous rushing or surf-like sound impression.

3. GEOMETRY

Long horizontal boundary. Irregular vertical mass. Curved edge or shoreline-like contour. Layered bands. Few repeating elements.

4. SPATIAL RELATIONSHIPS

Large open expanse adjacent to a raised solid feature. Strong near/far depth. One side feels lower and flatter; another rises sharply. Possible separation between land-like and water-like areas.

5. DISTINCTIVE FEATURES

A steep, uneven elevated form next to a broad smoother surface is most salient. There may be a narrow edge, drop, or transition zone between them.

6. ANALYTICAL OVERLAY — guesses

- Coastal cliff
- Rocky shoreline
- Large lake or sea beside elevated terrain

7. CONFIDENCE

23/100

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 3 • Trial 5

Yellow toy car | Identifier: M3JW-WM39

AI description

1. GESTALT

Artificial-dominant; structure/object. Partially enclosed. Dry. Static overall with a sense of height or elevation.

2. SENSORY QUALITIES

Light gray, beige, dark brown, and small bright highlights. Hard, dry surfaces. Rough stone/concrete-like texture mixed with smoother material. Mild to warm temperature. Quiet, possibly faint ambient human or mechanical noise.

3. GEOMETRY

Strong verticals and horizontals. Rectangular openings. Repeated linear elements. Angular edges. Possible stepped or tiered form.

4. SPATIAL RELATIONSHIPS

A larger upright mass with smaller features arranged along or within it. Something elevated above a lower open area. Moderate sense of depth, with foreground structure and more distant surroundings.

5. DISTINCTIVE FEATURES

A tall or elevated rigid feature with repeated openings or divisions is most salient. One edge feels sharply defined against open space.

6. ANALYTICAL OVERLAY — guesses

- Building facade or tower
- Monumental stone/concrete structure
- Elevated architectural platform or terrace

7. CONFIDENCE

22/100

YOUR UNBLINDED RATING: ☐ Hit ☒ Partial ☐ Miss

Neutral Session 3 • Trial 6

Metal chain | Identifier: J5G7-MUNE

AI description

1. GESTALT

Natural and landscape-like. Open. Strong impression of wetness or proximity to water. Broad horizontal extent with one more prominent raised feature.

2. SENSORY QUALITIES

Blue-gray, green, pale tan, and white. Bright but slightly diffuse light. Cool air. Smooth reflective surface contrasted with rough, irregular texture. Possible rushing, splashing, or wind-like sound. Some continuous movement.

3. GEOMETRY

Broad horizontal bands. Curved or irregular edges. One sloping or elevated form. Repeating rippled patterns. Few hard angles.

4. SPATIAL RELATIONSHIPS

Large open area. Lower flat region adjacent to or surrounding a higher mass. Distant horizon. Sense of foreground-to-background depth. Possibly viewed from an elevated position.

5. DISTINCTIVE FEATURES

A sharp contrast between a relatively smooth expanse and a rough, broken boundary. One feature seems to project outward or rise abruptly from the surrounding area.

6. ANALYTICAL OVERLAY — guesses

- Coastline or rocky shore
- Waterfall or fast-moving water beside rock
- Cliff or headland near a large body of water

7. CONFIDENCE

Neutral Session 3 • Trial 7

Large quartz crystal with terminated point | Identifier: 8KZM-KVM4

AI description

1. GESTALT

Natural-dominant; open landscape. Possible water or moisture. Broad, quiet, somewhat isolated.

2. SENSORY QUALITIES

Deep blue, gray-green, pale white, and dark brown. Cool temperature. Smooth reflective quality contrasted with rough, uneven surfaces. Damp or wet impression. Soft wind-like sound; possible distant rushing.

3. GEOMETRY

Long horizontal bands. Irregular curved edges. One prominent sloping or rising mass. Few sharp angles. Layered contours.

4. SPATIAL RELATIONSHIPS

Wide open foreground or middle distance. Larger elevated feature beyond or beside it. Strong sense of depth. Low flat area adjacent to higher uneven terrain.

5. DISTINCTIVE FEATURES

A smooth, darker expanse bordered by an irregular lighter edge is most salient. Behind it, a broad rising form seems to dominate the scene.

6. ANALYTICAL OVERLAY — guesses

- Mountain lake
- Fjord or inlet
- Reservoir bordered by steep terrain

7. CONFIDENCE

YOUR UNBLINDED RATING: ☐ Hit ☐ Partial ☐ Miss

Neutral Session 3 • Trial 8

Black pistol grip | Identifier: UFZA-FKVH

AI description

1. GESTALT

Artificial-dominant; object/structure. Enclosed or semi-enclosed. Dense, static, with one localized energetic or active element.

2. SENSORY QUALITIES

Dark gray, black, silver, and a bright yellow-white highlight. Cool temperature. Smooth, hard, metallic surfaces. Some glossy reflection. Faint mechanical hum, clicking, or vibration impression.

3. GEOMETRY

Circular or cylindrical feature combined with straight rectangular framing. Repeated small components. Strong radial or concentric geometry may be present.

4. SPATIAL RELATIONSHIPS

A compact central feature sits within or against a larger rigid assembly. Smaller elements cluster tightly around it. Little sense of distant space.

5. DISTINCTIVE FEATURES

Most salient is a rounded mechanical-looking feature with a darker center or recess, surrounded by harder linear structure. A small bright point or reflective edge stands out.

6. ANALYTICAL OVERLAY — guesses

- Machine or engine component
- Industrial control/mechanical assembly
- Camera, lens, or instrument-like device

7. CONFIDENCE

17/100

Neutral Session 3 • Trial 9

Goku action figure | Identifier: HFN9-DPRM

AI description

1. GESTALT

Natural and artificial mixed. Open setting. Possible structure near water or another broad flat surface. Mostly static.

2. SENSORY QUALITIES

Pale blue, gray, white, muted brown. Bright light with reflective highlights. Cool to mild temperature. Smooth hard surfaces alongside a softer or fluid texture. Slight wind impression; faint repetitive ambient sound.

3. GEOMETRY

Strong horizontals, several vertical elements, and one diagonal or sloping feature. Repeated narrow lines. Possible rectangular openings or divisions.

4. SPATIAL RELATIONSHIPS

A long, low feature extends across part of the scene. Taller elements rise from or behind it. Open space dominates beyond. Some sense of foreground-to-background layering.

5. DISTINCTIVE FEATURES

Most salient is a repeated series of upright elements associated with a longer horizontal form. A reflective or light-toned surface appears nearby or below.

6. ANALYTICAL OVERLAY — guesses

- Pier or dock
- Waterfront structure
- Bridge or elevated walkway

7. CONFIDENCE

Neutral Session 3 • Trial 10

White square pyramidal plastic piece | Identifier: 9HVR-79NR

AI description

1. GESTALT

Natural-dominant. Open landscape. Dry to mixed moisture. Large-scale, quiet, exposed.

2. SENSORY QUALITIES

Warm tan, reddish-brown, pale gray, and blue. Bright light. Warm temperature. Rough, granular, stone-like textures. Dry air impression. Faint wind; otherwise little sound.

3. GEOMETRY

Irregular vertical faces, layered horizontal bands, angular breaks, and sloping contours. One narrow gap or channel-like feature may be present.

4. SPATIAL RELATIONSHIPS

Large elevated masses separated by lower space. Strong depth. One feature appears closer and darker, with broader terrain extending behind it. Open sky or empty space above.

5. DISTINCTIVE FEATURES

A steep, layered surface with strong tonal changes is most salient. There may be a pronounced cut, recess, or narrow passage between larger masses.

6. ANALYTICAL OVERLAY — guesses

- Canyon or gorge
- Rocky desert formation
- Cliff-lined valley
